Sustainability Report

Dohrn Transfer and the entire Pitt Ohio Transportation Group are focused on Sustainability & being a responsible steward of our environment. We are committed to investing in sustainability, reducing our carbon footprint & giving back to our community.

Carbon Footprint

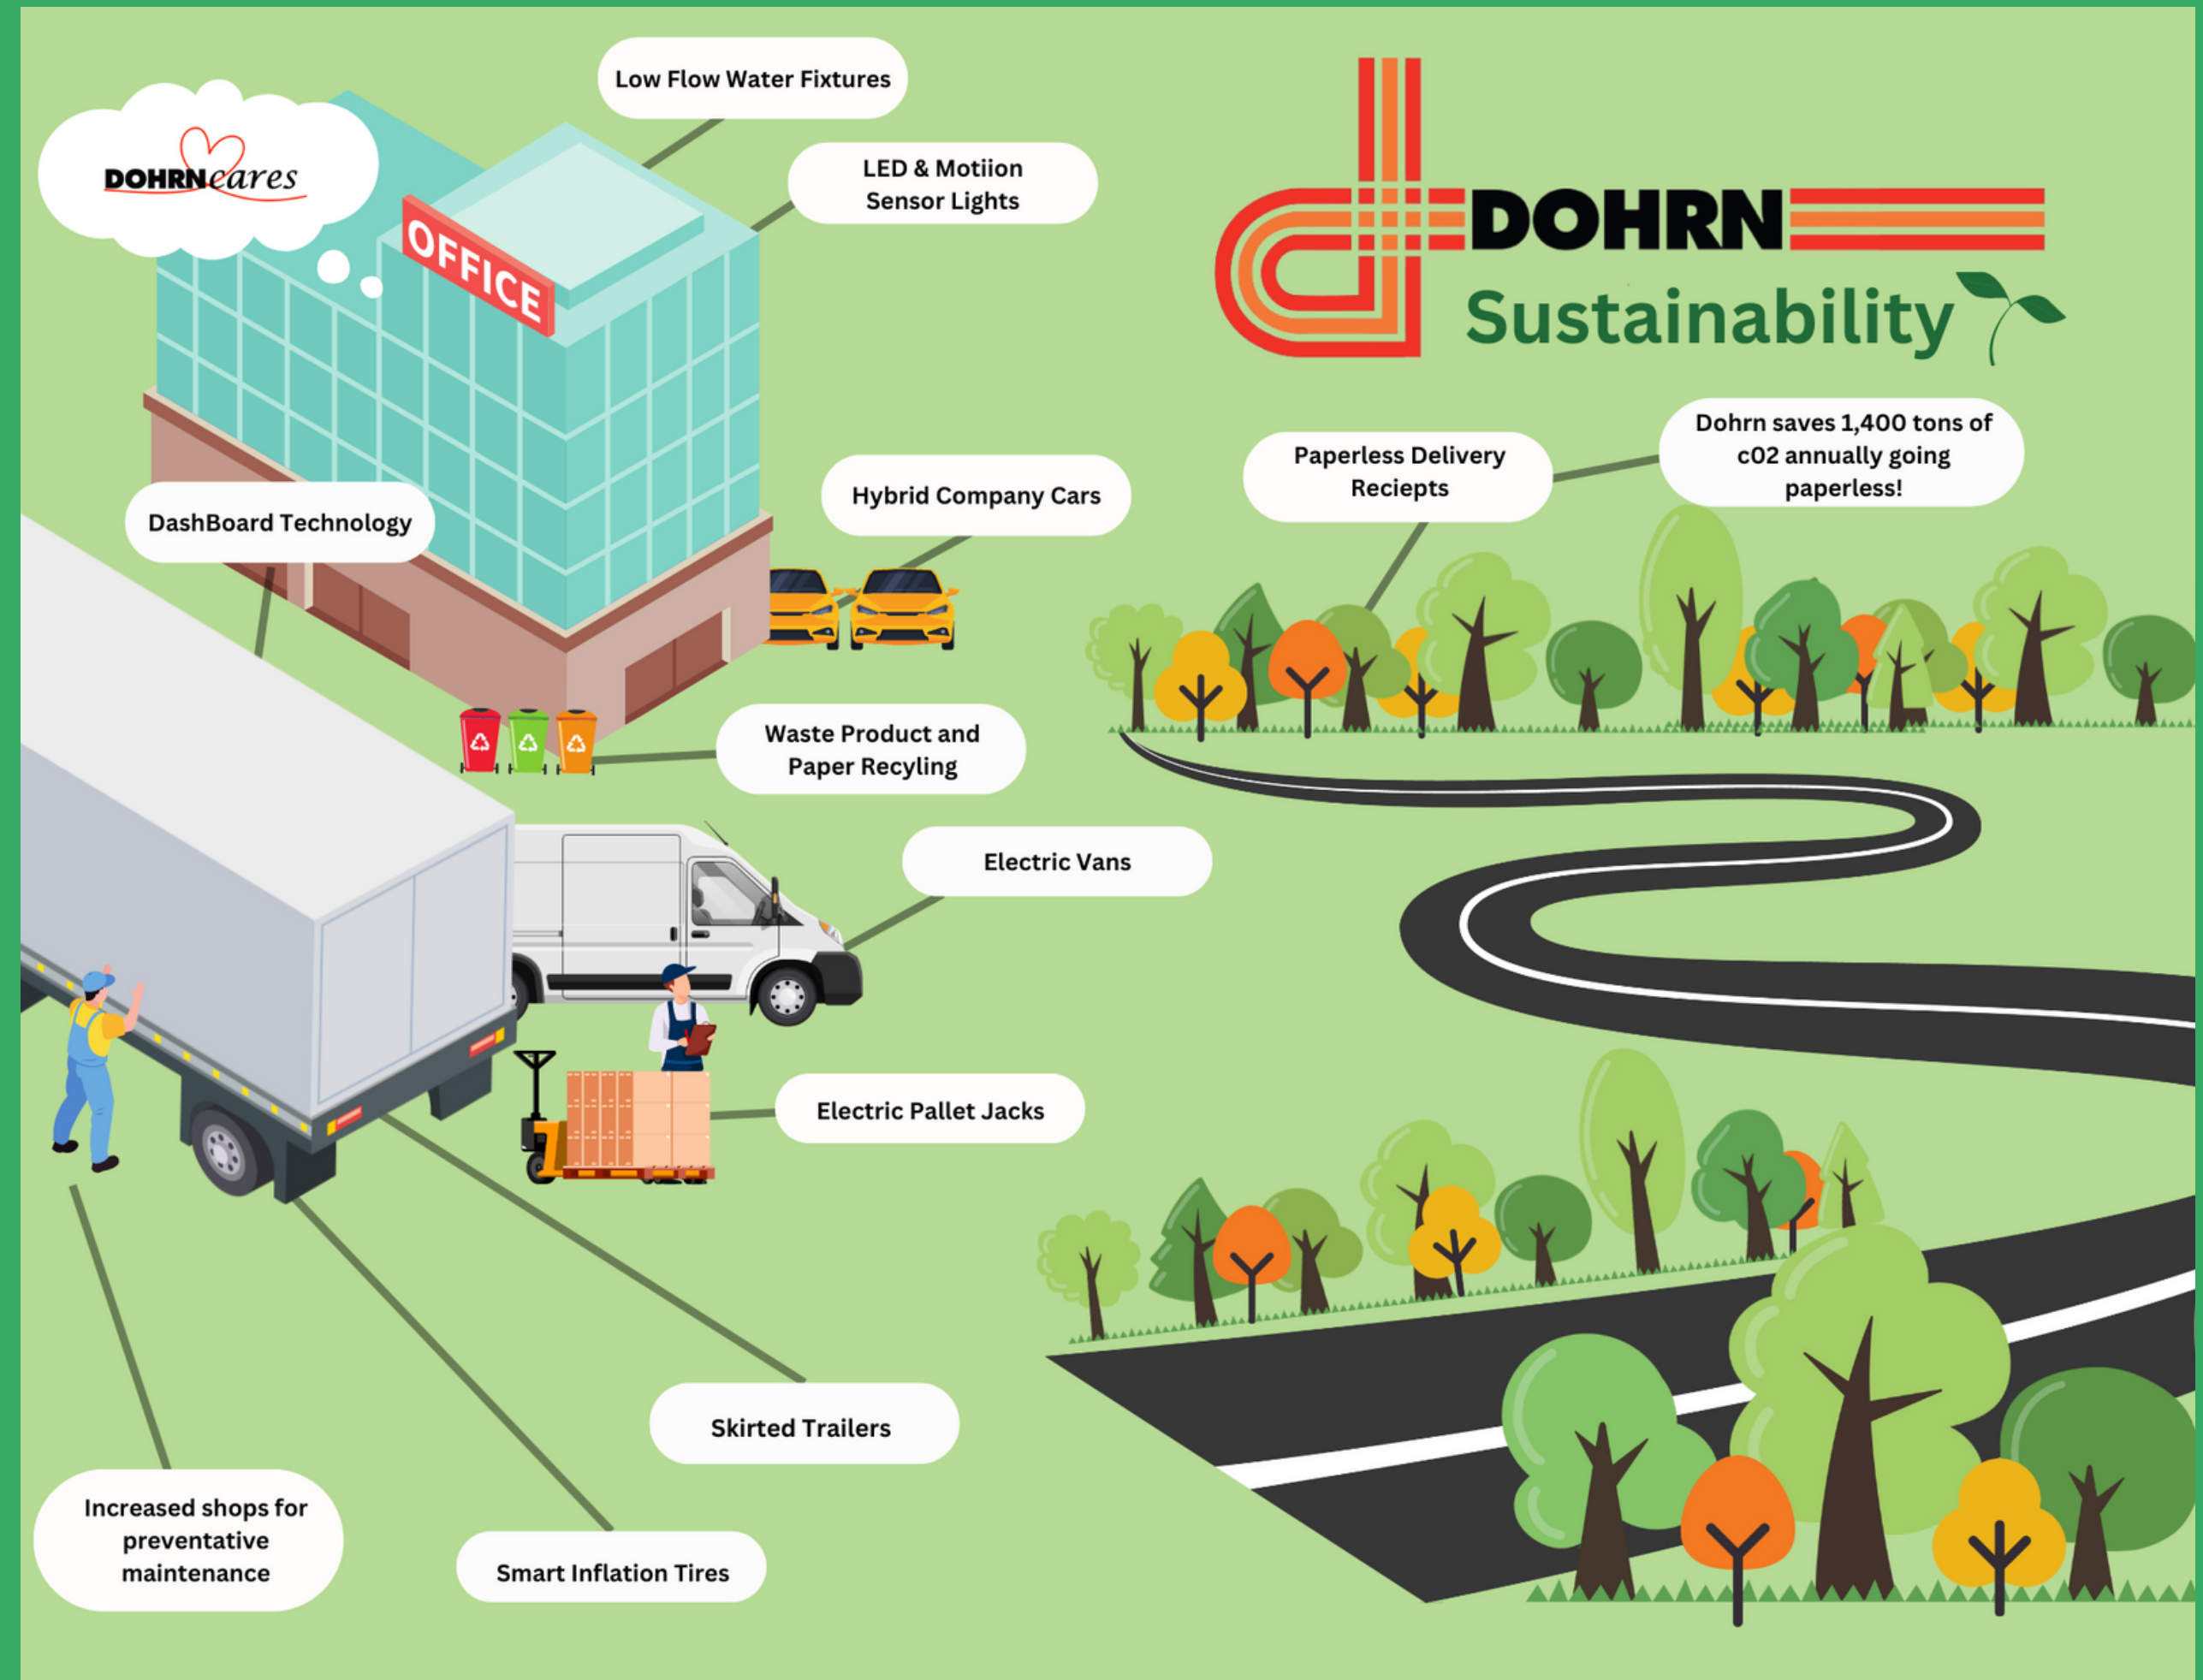

What we do to Reduce our Carbon Footprint

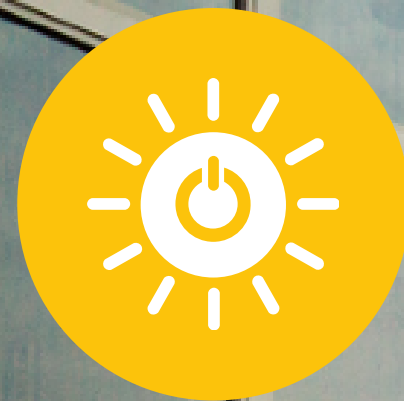

- Electric pallet jacks, reducing forklifts
- Modern, well-maintained fleet of latest model tractor trailers, straight trucks & sprinter vans.
- Smaller, more efficient equipment
- Electric Sprinter Van
- Skirted trailers for improved aerodynamics
- Hybrid company vehicles
- New fleet specification with high efficient drive lines
- Driver fuel efficiency dashboards, monitors idling to help eliminate excess waste & pollution
- Increased shops for more preventative maintenance
- Increased MPG YoY
- Smart Tire inflation technology

We are proud of the changes we are making to move our industry forward. We believe in being a responsible steward of our environment. Dohrn Transfer is committed to investing in sustainability and reducing our carbon footprint.

Facility Updates

**LED lights, which are 80% more efficient than traditional lighting, and reduces the carbon footprint by up to a third.
Installing Light motion sensors**

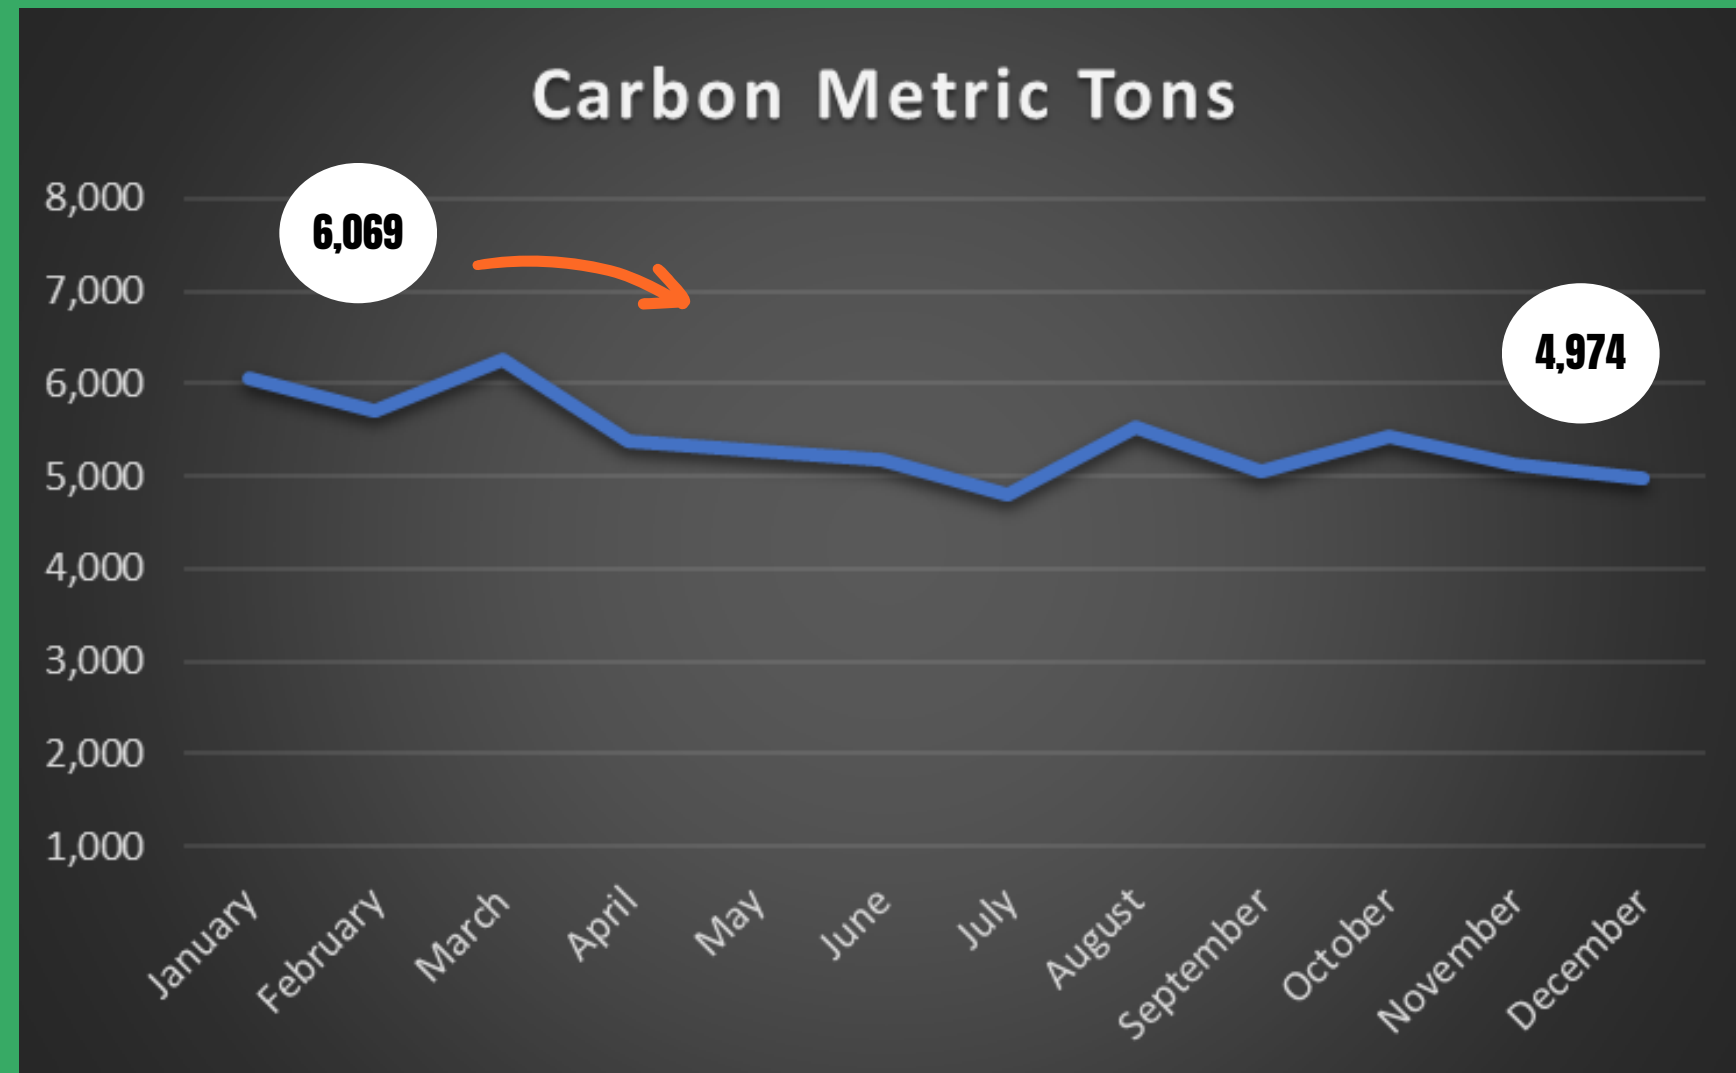

**Low-flow fixtures and waterless urinal reduce water use to
30% below standard**

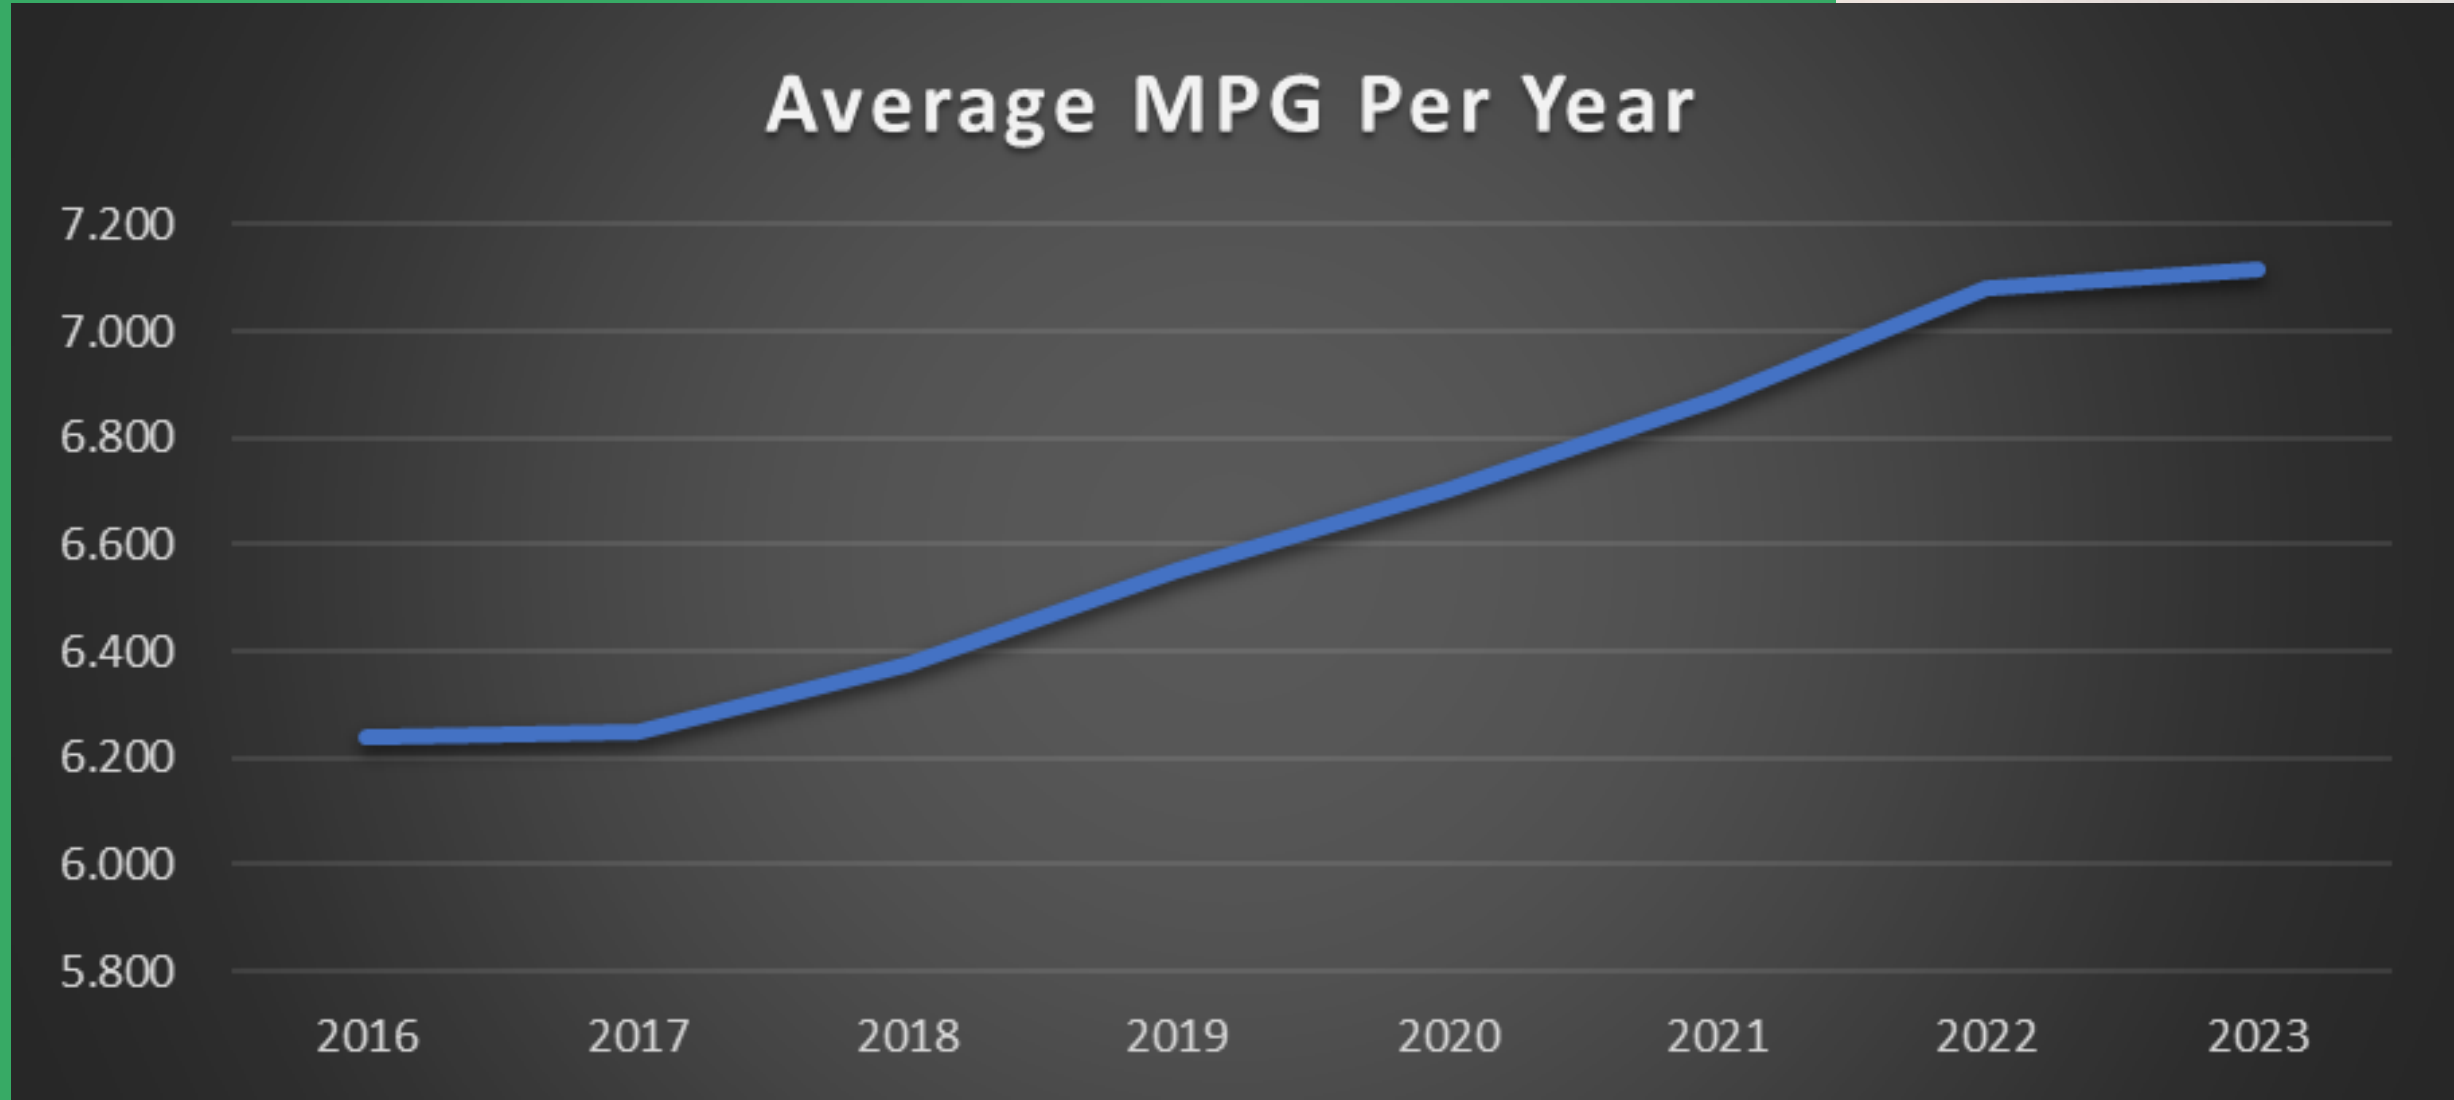

Decarbonization

Our commitment to sustainability is reflected in the significant reduction of our carbon footprint over the past year. Ending 2023 we shrank our carbon emissions by 19%!

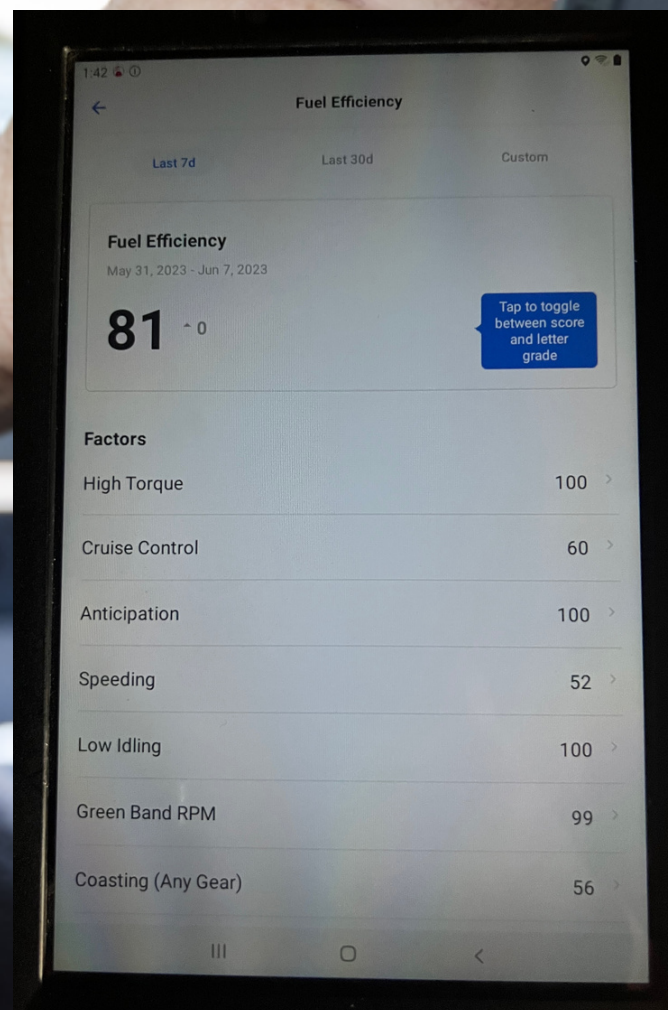

Dohrn Transfer keeps current on emissions requirements by purchasing new equipment with the latest aftertreatment technology available every year. We have successfully increased our fuel efficiency by 14% since 2016!

Driver Gamification

In a world where road safety and environmental sustainability are paramount concerns, a groundbreaking concept emerges: driver gamification. This innovative approach aims to revolutionize the way we perceive and engage with safe and eco-friendly driving practices.

As drivers embark on their daily routes, they are presented with a series of dashboards that monitor their performance. From avoiding distractions and maintaining optimal speed to practicing smooth acceleration and deceleration, every action counts. Real-time feedback and performance metrics keep drivers engaged and motivated, offering valuable insights into their driving habits.

Dohrn Cares is a committee of employees established based on our core value of Personal Touch. Our employees and their families live in the communities we serve, which is why we believe in participating in their growth through supporting them by volunteering our time and contributions.

Message from the CCO

“Most people don’t think of trucking companies when they consider sustainable businesses. However, we understand that due to the volume of fuel consumption, even minor changes within our industry can yield significant environmental impacts. This awareness drives our commitment to implementing sustainable practices throughout our operations to lower our CO2 footprint. We also recognize that our customers want to work with scope 3 providers who are responsible stewards of our environment and are willing to share carbon usage down to a shipment level. Sustainability is part of our culture at Dohrn.”

- Heather Dohrn EVP/Chief Commercial Officer
